Allowable Subject Matter

The indicated allowability of claims 10, 12-18 and 21-24 is withdrawn in view of the newly discovered reference(s) to Fischell (U.S. Patent No. 5545143. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

Claims 10 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Fischell. The referenced patent discloses an access means with an elastic self closing diaphragm for accessing the interior of the body, the access means implantable in the body and adapted to allow access to the body fluids through the diaphragm. Please refer to figure 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-15, 17, 18, and 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Fischell in view of Werp et al.** Fischell does not teach the use of an access port for the testing of fluids in the body or originating within the body. However, the use of access ports used to test fluids and tissue samples is conventional as evidenced by Werp et al. The Werp et al. patent discloses an access port that can be used for testing as clearly indicated in column 4, line 43. Based on the teachings of

Art Unit: 3763

Werp et al., a person of ordinary skill in the art would consider the enhancements of the claims listed above as obvious design alternatives.

Conclusion

In view of the new art used in the rejections above, this is not a final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any). If an application number has not been assigned to the application, this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
